Fintech

Oskari Paasikivi advises clients on a broad range of data protection and other data regulatory issues, with a particular focus on complex ICT contract preparation and negotiation, supporting clients in handling data breaches and similar incidents as well as advising clients in the development and management of related compliance processes. He also specialises in employee privacy related matters.

In addition, Oskari Paasikivi has experience in the field of M&A. He works actively in technology intensive transactions, including support in regulatory questions in due diligence reviews, advising in various data related issues in the execution of transactions as well as broader M&A related work.

Oskari Paasikivi is also an experienced and active lecturer in privacy and data regulatory topics and is often relied upon by numerous clients as well as significant training organisations. He also acts as a lecturer and bachelor thesis advisor at the University of Helsinki.
